

Job Description

Position: Dairy Manager

Overview:

A dairy manager orders product to satisfy ad programs and customer purchasing habits, controls inventory levels and code dates, works in a cooler for maximum periods of 20 minutes each, in temperatures 32° to 40°, repeatedly during a shift, and stocks dairy products in refrigerated dairy food cases with temperatures near freezing. A dairy manager also unloads product from trucks, operates stock dollies, pallet jacks, mechanical price marking devices and case cutters. They lift and stack up to 50 # and reach and stock product on shelves up to 6 ft high. In addition, they communicate and give direction to other employees and customers, and perform sweeping and general cleaning functions.
